PLEASE HELP US TO EXTEND THE LIVE SITE! LIVE SITE: INSERVICE: Minecraft : Explora : Table of contents: Hey everyone! This was a video I recorded a while back for the TONIGHTS gameplay. Hope you like it and thanks for watching. Let's get social! Twitter: Instagram: I hope you enjoy this video. It was a team effort. I wanted to improve on my last game, but I didn't have enough information and resources to do so. So I asked my friends for help. My friends and I worked on this game together, which is good because it actually came out pretty good. This video is the most recent game of King of Random - my partner in crime and I hosted this event. We both came into this event with lots of initial ideas and not a lot of things to work with. We ended up making this video on a few days notice as a collaborative effort. I uploaded the video to Facebook, but it seemed to not be recording anything, so I uploaded it to Youtube. One of my top pastimes is to look back at the creations of my friends. On top of that, I'm also increasingly interested in the game industry and curious what's coming next. So what better way to immerse myself into the universe of games than to look at the games that I and my friends made. The first of these videos is from a four man team who traveled back in time and eliminated the dinosaur-men in their prime. I'm Klim. My friends and I have been working on this game since 2016 (that's three years ago) and it's finally finished. "Best And Lethal" is our gaming company and is a large creative project that takes our time. Donations or any bff6bb2d33
